Declinationes Nominum

Magna est in hac lingua declinationum copia quæ suo ordine recensebitur et licet in principio di=scendi cupidos possit absterrere, hoc meo labore fiet ut spero facilior, quæ ex libro gentilium [illegible] ut vo=cant summo labore vix tandem percipitur. Juxta ter=minationum varietates variatur declinatio nec solum hoc verum etiam juxta generum diversitatem. Casus sunt octo. Numeri tres ut apud Græcos singularis dualis et pluralis. Singularem vocant ഏകവചനം. Dualem ദ്വിവചനം. Pluralem ബഹുവചനം. Voluissem juxta ordinem latinorum casuum illos casus collocare, sed, licet in principio aliqua incipientibus perturbatio ob ordinem à latino diversum sit oritura, quia tamen ex alio capite casuum scilicet similitudine facilius erit illos addi=scere secutus sum ordinem a peritis hujatibus usitatum
